

# Sales Dashboard Report

**Interactive Sales Analysis using  
Tableau**

**Presented by: Mohammed Ammar P**

# Objective

- • Analyze and visualize overall sales performance
- • Identify trends across time, regions, and deal sizes
- • Help stakeholders make informed business decisions

# Key KPIs (Metric Summary)

-  Total Sales: ₹ 100000000
-  Top Performing Country: USA
-  Peak Sales Month: October
-  Largest Deal Size: Large

# Monthly Sales Trend

- Sales peaked in October with over ₹200 million.
- A gradual increase from Q1 to Q4.

# Sales by Country

- • USA, France, and Germany lead in total revenue.
- • Emerging markets like Singapore showed moderate performance.

# Order Status Breakdown

- • Majority of orders were Shipped (X%).
- • Only Y% were Cancelled or On Hold.

# Sales by Deal Size

- Large deals account for over 60% of revenue.
- Opportunity to grow Small and Medium deal segments.

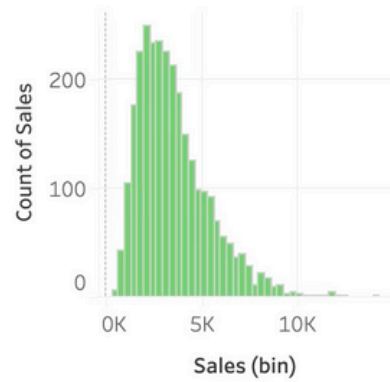

# Key Insights & Recommendations

- Insights:
  - - Sales are strongest in Q4
  - - High concentration of revenue from a few countries
  - - Large deal size dominates sales
- Recommendations:
  - - Explore marketing in underperforming regions
  - - Improve smaller deal conversion strategies
  - - Focus on reducing Cancelled orders

- Tableau helped create a clear, interactive view of sales.
- Stakeholders can use the dashboard for real-time decisions.
- The dashboard is scalable to include profit, targets, and forecasts.

### Total Sales

### Monthly sales

### Sales by Deal Size

### Sales by Country

### Order Status Breakdown

A soft, circular watercolor splash in shades of light green and teal serves as a background for the text. It has a painterly, textured appearance with some darker green speckles and a few small dots trailing off to the bottom right.

thankyou
